

Matias Cattaneo

Industrial Engineer focused on Analytics Engineering, Business Intelligence and Data Governance across multiple industries including Manufacturing, Finance, Retail, and Telecommunications.

Professional Experience

- **Data Engineer** | [IAgro](#) (September 2025 - Present)
 - Building scalable Snowflake data pipelines to ensure consistency, reliability, and accessibility across analytics layers.
 - Developing modular dbt models with clear lineage to improve data quality and reduce manual intervention.
 - Standardizing reference datasets to support accurate reporting.
 - Managing Snowflake RBAC structures and warehouse settings to optimize security, performance, and compliance.

Tools: Snowflake, dbt, Fivetran, LookerStudio
Field: Agricultural

- **Analytics Engineer** | [Hakkoda](#) (January 2025 - August 2025)
 - Designed and developed data pipelines using dbt to ensure efficient and repeatable ELT processes.
 - Built interactive dashboards in Tableau to support business analysis and decision-making.
 - Used Snowflake databases to provide queries for data validation.
 - Collaborated with business, IT, and Governance teams to translate the analytic needs into data assets.

Tools: Tableau, dbt, SQL, Snowflake, Git, Bitbucket.
Field: Retail - Food Distribution (US Foods)

- **Business Analyst** | [Speedcast](#) (January 2024 - January 2025)
 - Worked on a project to improve customer and product data, focusing on making processes faster and finding automation opportunities.
 - Compared different Master Data Management (MDM) tools, including IBM Infosphere, Microsoft Purview, Rudol.AI, and Profisee, to recommend the best option.
 - Created process flow diagrams to explain how to set up new customer accounts, making roles and steps clearer.
 - Helped improve the order creation process by integrating new functionalities of key systems like Dynamics 365 (CRM) and ServiceNow.

Tools: Power BI, Microsoft Office, Microsoft Purview, Azure DevOps, Miro, Dynamics 365.
Field: Telecommunications

- **Data Governance Analyst** | [Hakkoda](#) (September 2023 - January 2024)
 - Worked with business and IT teams to introduce and explain data governance concepts.
 - Reviewed data policies and suggested ways to improve data quality.
 - Reviewed metrics and calculations from reports, making sure they matched the needs of the business and technical teams, the goal was to migrate old legacy reports to modern tools such as Snowflake, Tableau and Sigma.

Tools: SQL, Snowflake, Alation, Microsoft Office.
Field: Retail - Food Distribution (US Foods)

- **Data Governance Analyst** | [Banco de Cordoba](#) (August 2022 - August 2023)
 - Supported the management of data assets to ensure they were available and accurate, helping the organization make better use of data with Data Visualization tools such as PowerBI.
 - Worked closely with both business and technical teams to translate business needs into data solutions in the Data Warehouse (on-premise).
 - Wrote SQL scripts to model and manage data efficiently for the Risk Prevention area by looking at the Credit Card data.
 - Assisted internal teams with the adoption of new data tools and processes.
 - Ensured data integrity between Prisma (payment processor) and the core system (SOA).
 - Managed requests and kept track of the progress on data-related tasks with Trello.
 - Profiling of data assets with Python.

Tools: Power BI, Microsoft SQL Server, Microsoft Office, Python, Oracle Database.
Field: Finance

- **Data Analyst (BI) | Analyst in Production and Logistics Processes - [Plásticos Dise](#)**
(August 2020 - July 2022)
 - Digitalized the data collection process, improving data accuracy and accessibility with Google Forms.
 - Developed productivity reports using OEE and OKR indicators to track performance.
 - Created dashboards to detect risks and identify business opportunities.
 - Measured customer delivery service using the OTD indicator and suggested improvements.
 - Managed inventory control and planning using SAP ERP.
 - Measured machine availability and identified ways to improve uptime.

Tools: Power BI, SAP, Microsoft Office.

Field: Manufacturing

- **Process Engineering Intern | [Plásticos Dise](#)** (February 2019 - July 2020)
 - Gathered and standardized production variables to improve process efficiency.
 - Coordinated with suppliers to ensure timely restocking of production materials.
 - Improved machine setup times and productivity using the SMED method.
 - Created training guides to standardize operational procedures.
 - Developed Value Stream Mapping (VSM) to identify and eliminate process inefficiencies.

Tools: Microsoft Office, Poka.

Field: Manufacturing

Education

- **Industrial Engineering Degree**
Universidad Tecnológica Nacional - Facultad Regional Córdoba
March 2014 - February 2021
Final Project: Introduction to business intelligence and proposals for improvement in a plastic packaging factory.
- **Diploma in Data Science, Machine Learning and Their Applications**
Universidad Nacional de Córdoba - Facultad de Matemática, Astronomía, Física y Computación (FAMAF)
February 2021 - December 2021
Final Project: Applying Machine Learning to demand prediction.
- **Business Intelligence Executive Program**
Business School - Universidad Torcuato Di Tella
October 2021 - November 2021
- **Fundamentals of Databases (Oracle Database)**
UTN FRBA e-Learning Center
August 2022 - September 2022
- **[SnowPro Core Certification \(Snowflake\)](#)**
Issued on March 2025

Technical Skills

Data Warehousing	Snowflake, Microsoft SQL Server, Oracle Database
Business Intelligence	Power BI, Tableau, Sigma, LookerStudio
Data Transformation	dbt (Data Build Tool), SQL
Programming	Python, SQL, Git
Data Mining	Knime, Python libraries (Pandas, NumPy, Seaborn)
Data Governance	Microsoft Purview, Alation, Confluence
Office Tools	Microsoft Office Suite, Google Workspace
Project Management	Jira, Azure DevOps, Trello, Miro

Languages

- **Spanish:** Native Proficiency
- **English:** Full professional proficiency – B2
