

Matias Cattaneo

Analytics Engineer · Snowflake | dbt | Power BI

mcattaneo2195@gmail.com · linkedin.com/in/matiascattaneo

Analytics Engineer with a background in Industrial Engineering. I build data pipelines, models, and dashboards with Snowflake, dbt, and Power BI so companies can make decisions with reliable data. Over the last five years I have worked across agriculture, retail, banking, telecom, and manufacturing.

PROFESSIONAL EXPERIENCE

Data Engineer — IAgro · Agriculture

September 2025 – Present

- Own the data platform end to end for multiple agriculture clients: automated ingestion with Fivetran, Snowflake warehousing, dbt models, and Power BI / Looker Studio dashboards tracking farm-production KPIs.
- Built AI assistants on Snowflake that answer plain-language questions over client data, removing the analyst bottleneck for routine queries.
- Standardized reference data across all clients in dbt, eliminating cross-client report inconsistencies and rework.
- Manage Snowflake roles, access, and warehouse sizing to keep compute costs under control as new clients onboard.
- Act as single point of accountability per client for data quality, KPI definitions, and production troubleshooting.

Tools: Snowflake, dbt, Fivetran, Power BI, Looker Studio

Data & Analytics Consultant — Inisoft

September 2023 – August 2025

Client Assignment: Analytics Engineer | Hakkoda (US Foods)

January 2025 – August 2025

- Built dbt pipelines on Snowflake powering repeatable ELT for US Foods, a Fortune 500 food distributor, and defined consistent metrics in the dbt Semantic Layer.
- Created Tableau dashboards for business analysis and validated the underlying data with SQL in Snowflake.
- Partnered with business, IT, and Data Governance teams to turn analytics requirements into governed, reusable data assets.

Tools: Tableau, Sigma, dbt, SQL, Snowflake, Dimensional Modeling, Git, Bitbucket

Client Assignment: Business Analyst | Speedcast

January 2024 – January 2025

- Re-engineered customer and product master-data processes, identifying automation opportunities that removed manual steps from account setup.
- Evaluated MDM platforms (IBM InfoSphere, Microsoft Purview, Profisee) and delivered the comparison that informed the company's tooling decision.
- Mapped the new-customer onboarding flow end to end, clarifying ownership and steps across teams.
- Supported the integration of Dynamics 365 CRM with ServiceNow to accelerate order creation.

Tools: Power BI, Microsoft Purview, Azure DevOps, Miro, Dynamics 365

Client Assignment: Data Governance Analyst | Hakkoda (US Foods)

September 2023 – January 2024

- Validated report metrics through the migration of legacy reports to Snowflake, Tableau, and Sigma, protecting trust in the numbers during cutover.
- Introduced data-governance practices to business and IT teams; reviewed data policies and proposed improvements that were adopted.

Tools: SQL, Snowflake, Alation

Data Governance Analyst — Banco de Córdoba · Banking

August 2022 – August 2023

- Modeled credit-card data in SQL for the bank's Risk Prevention team.
- Reconciled data between the payment processor (Prisma) and the bank's core system, preventing reporting mismatches.
- Kept Power BI reporting accurate and available by curating the bank's data assets, profiling them with Python.
- Drove adoption of new data tools and processes across internal teams.

Tools: Power BI, Microsoft SQL Server, Python, Oracle Database

Data Analyst (BI) — Plásticos Dise · Manufacturing

August 2020 – July 2022

- Replaced manual, paper-based production data capture with Google Forms, improving accuracy and plant-wide access to data.
- Built OEE and OKR productivity dashboards in Power BI, giving plant leadership direct visibility into line performance.
- Measured on-time delivery (OTD) and proposed corrective improvements; ran inventory control and planning in SAP.

Tools: Power BI, SAP

Process Engineering Intern — Plásticos Dise · Manufacturing

February 2019 – July 2020

- Reduced machine setup times by applying the SMED method.
- Mapped value streams (VSM) to find and remove process inefficiencies.
- Standardized production data and operations through normalization and training guides.

Tools: Microsoft Office, Poka

EDUCATION

Industrial Engineering Degree

March 2014 – February 2021

Universidad Tecnológica Nacional — Facultad Regional Córdoba

Final Project: Introduction to business intelligence and proposals for improvement in a plastic packaging factory.

Diploma in Data Science, Machine Learning and Their Applications

February 2021 – December 2021

Universidad Nacional de Córdoba — FAMAF

Final Project: Applying Machine Learning to demand prediction.

Business Intelligence Executive Program

October 2021 – November 2021

Business School — Universidad Torcuato Di Tella

Fundamentals of Databases (Oracle Database)

August 2022 – September 2022

UTN FRBA e-Learning Center

CERTIFICATIONS

SnowPro Core Certification — Snowflake · March 2025 · [View credential](#)

SKILLS

Data Warehouse: Snowflake · **Data Transformation:** dbt, SQL · **Data Ingestion:** Fivetran

Business Intelligence: Power BI, Tableau, Looker Studio · **Programming:** Python, Git

AI Tools: Claude Code, Codex · **Governance & Quality:** Alation, Microsoft Purview

LANGUAGES

Spanish: Native · **English:** Full Professional Proficiency
